

**Job Title: Agronomist****Company: Mantra Agri Solutions Pvt. Ltd.****Department: Agronomy****Location: Idar, Modasa, Deesa, Banaskantha - Gujarat****Reports To: Manager****Industry: Agriculture / Export**

About Mantra Agri:

Mantra Agri is a pioneering venture in the Agri-supply chain space, specializing in large-scale potato procurement and processing. Backed by the legacy and market leadership of Haldiram, this joint venture aims to streamline farm-to-fork supply for quality-focused FMCG products.

Role Overview:

The Agronomist will support field-level agronomy operations, farmer engagement, and crop management activities. This role involves working closely with farmers and internal teams to ensure effective execution of farming practices, quality compliance, and productivity improvement.

Job Responsibilities:**1. Farmer Coordination & Support**

- Assist in onboarding farmers and maintaining relationships
- Support execution and monitoring of contract farming activities
- Address basic farmer queries and escalate issues when required
- Coordinate with field teams for smooth operations

2. Farm Operations Execution

- Support planning and implementation of crop activities
- Monitor crop health, irrigation, and input usage
- Assist in improving yield and maintaining crop quality
- Conduct regular farm visits and maintain field reports

3. Quality & Compliance

- Support implementation of quality standards from sowing to harvest
- Assist in residue compliance, sampling, and traceability processes
- Ensure adherence to company guidelines and agronomy practices

4. Post-Harvest & Storage Support

- Assist in basic post-harvest handling and quality checks
- Support coordination with cold storage and logistics teams
- Help monitor inventory movement and reporting

5. Data & Reporting

- Maintain farm-level data, reports, and documentation
 - Support MIS preparation using Excel/Google Sheets
 - Update records related to productivity, quality, and farmer activities
-

**Required Skills & Qualifications:**

- Experience: 0–3 years in Agronomy / Agriculture / Field Operations
 - Education: B.Sc. Agriculture / Horticulture / Agronomy or related field
 - Basic understanding of crop practices and farm operations
 - Good communication and interpersonal skills
 - Willingness to travel and work in field conditions
 - Basic knowledge of MS Excel / Google Sheets
-

Key Expectations:

- Effective support in field operations and farmer coordination
- Timely reporting and documentation
- Adherence to quality and agronomy practices
- Willingness to learn and grow within the agribusiness ecosystem
